

# David J. Danyluk

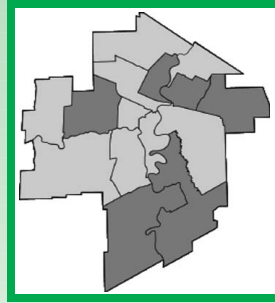

## After 17 years...its time for a change!

David J. Danyluk is a co-founder of the only municipal party in the city, the Winnipeg Green Party. "I decided it was time to run for council because too many incumbents stay far too long. This is certainly true in Elmwood-East Kildonan. Imagine another 4 years of...what? It is time for fresh ideas."

David entered high school at Miles Mac in 1989, the same year Councillor Lillian Thomas was first elected! David received his real estate license in 1994, becoming the youngest Realtor at Re/max. David worked from the Henderson Hwy. office and in the Kildonan area. David bought his first home at 23 and has been paying city taxes ever since. David was a volunteer Scout Leader and Venturer Advisor in East Kildonan for years.

David returned to University in the late 1990s to complete his BA in Community Politics and Administrative Studies and is completing his Master's Degree in City Planning at the U of M.

David has been the coordinator of the award-winning volunteer organization Save Our Seine (SOS) for 4 years. SOS looks after 330 acres of City-owned public park space with no city funding. "One major success was protecting 82 acres of pristine, urban forest along the Seine River from sprawl. But my happiest achievement was marrying my wife Theresa on Canada Day 2006."

The Winnipeg Green Party is running candidates in six Winnipeg wards:

- St. Vital
- Mynarski
- Elmwood - East Kildonan
- St. Norbert
- St. James - Brooklands
- Transcona

on October 25th **VOTE GREEN**

**Finally, a new vision  
with fresh ideas for  
Elmwood - East Kildonan**

**David J. Danyluk**

**experienced • committed**

Let's rejuvenate our role on council together!

**ON OCTOBER 25<sup>th</sup>  
ELECT**

**David J. Danyluk  
for city councillor**

**ELMWOOD -  
EAST KILDONAN**

# Winnipeg Green Party's vision for the City of Winnipeg and Elmwood - East Kildonan

## Democracy

- The Greens will harmonize the city ward boundaries with the provincial constituencies, thereby increasing the number of wards and council seats to 31.
- The Greens will ask Winnipeggers on the election ballot if councillors should serve a limit of two consecutive terms in office.
- The Winnipeg Greens will be committed to openness and accountability in decision-making.
- Public participation will be meaningful - that is, with timely and expanded access to information.
- Public-Private Partnership (PPP) agreements will be open to the public, not kept secret.

## Land Use Planning

- The Winnipeg Green Party will cancel the OlyWest hog plant deal if legally possible.
- The City's current "any growth now" mentality and policies will end.
- Plan Winnipeg will be strengthened and adhered to.
- The annual City Progress Report required by Plan Winnipeg will be produced.
- Planning focus will shift to reinvestment in existing neighbourhoods rather than developer-driven new ones; redevelopment will replace development as the preferred option.
- New, unserviced lots will be charged a levy to offset the cost of adding services and infrastructure.

- Future developments will follow Transit Oriented Development, where density is concentrated along transit routes.
- Parking space requirements for commercial buildings will be abolished.
- Existing roads will be fixed before new ones are built.
- A shift will be made from high maintenance park spaces, such as lawns, to natural spaces, such as forest and meadow.

## Transit

- Bus Rapid Transit will be implemented.
- Bus fares will be frozen.
- Universal bus passes for post-secondary students will be negotiated with all post-secondary academic institutions.
- The position of Active Transportation Coordinator will be created, to improve walking, cycling and other travel in the city.

## Water, Garbage and Recycling

- An independent task force will be established to investigate the economic feasibility of the City's waste disposal system, including the effectiveness of its recycling program.
- To encourage conservation, the water rate structure will be made progressive so that the price of water increases as use increases.
- Minimum fees at the City dump will be increased to match the private dump, with increased revenues to go to waste reduction programs.

- The initiatives to end the discharge of raw sewage into our rivers will be accelerated.
- The Winnipeg Greens will work to ensure the City adopts a green building policy.

## Municipal Revenue

- The Winnipeg Greens will strongly advocate for the Province to take responsibility for all property tax assessments, as the Province does for every other municipality in Manitoba.
- The Winnipeg Greens will strongly advocate for the removal of the provincial education tax from property tax bills.

## Health and Safety

- The Winnipeg Greens will not apply for pesticide use permits; money now spent for insect and weed control will go to preventive measures, such as drainage, and other natural pest control.
- A cosmetic pesticide by-law will be implemented.
- Maintenance of local community centres will be a priority.
- An independent commission will be established to work with emergency services to improve emergency response time.
- Video Lottery Terminals (VLTs) will be banned within the City through existing provincial legislation.
